01.01.2018

or the **10-digit number from the tag** at the end of a roll / offcut

- order reference,
- quantity of the claimed product,
- cause of the claim, including a detailed description of the problem (what is being claimed, what is the cause of the claim, more specific description of the problem caused by the defect on customer's machine, claimed quantity; attaching photos or videos is recommended),
- samples – you have to send unprocessed samples; if they are unavailable, samples of the finished product will do.

Sending samples is necessary in case of the following types of defects:

1. Stretched paper – in this case, a video showing the defect on customer's machine would be very helpful,
2. Loose winding on a core – the whole roll is the sample,
3. Paper layers stuck to each other,
4. Breaking paper (provide at least 30 cm long sample, without folds),
5. Paper peeling off too easily or not easily enough,
6. Breaking paper (provide at least 30 cm long sample, without folds),
7. Creases, constrictions, faulty adhesive application.

Sample parameters:

- gummed paper off the roll, at least 3m in length, with a tag

It would also be very helpful to know whether the problem tends to repeat, i.e. whether it occurred for the first time or again. If the problem repeats, we will need numbers of the orders where it occurred. In case of damage, we have to know where the defect is – is it random rolls or a single stack? Is the packaging damaged?

Quality claims shall be handled within 21 calendar days* of the date of submitting the claim in writing / in electronic form or, if any samples have to be verified, of the date when Pasaco receives the samples. If any additional expert opinion is needed, this period may be extended, upon agreement of the parties.

* in cases where the parties have entered into an agreement governing the product claiming process, provisions of that agreement shall prevail over provisions of the Internal Claiming Procedure.

QUANTITY CLAIMS

In the event that any quantity deviations (deficiency, excess, wrong product type) are found, the Customer has to:

- present the deviations in the delivery,
- provide the order number or the Goods Issued Note,
